

Compost Tea Bags

Compost Tea Bags offer a convenient and effective way to provide your plants with the nutrients they need for optimal growth. Each Bag will mix up to 5 gallons or 1 gallon for hungry plants. (ie. tomatoes, peppers). Once done with bag dump the bag directly into the garden.

Premium Ingredients: The tea bags are created using cow compost. These materials are rich in nutrients, and best of all, environmentally friendly

Easy Brewing Process: To brew the compost tea, simply soak the tea bag in water. It is recommended to agitate the bag by raising and lowering it in the water to encourage the release of nutrients and microbe activation.

Brewing Duration: For best results, allow the tea bag to soak in the water for three days. During this period, it is advisable to agitate the bag a couple of times each day to enhance microbe growth. It can be stored over the course of a few days.

Application Methods: Once the tea is ready, you can either spray it directly onto the leaves of your plants or use it when watering. This allows the nutrients and beneficial microbes to reach the plant roots and improve soil health. Use each time you water.

Benefits for Plants: The Super Compost Tea provides additional nutrition to your plants, enhancing their growth and overall health. It also improves soil fertility and structure, promoting healthier root systems and better nutrient uptake.

Using the Super Compost Tea Bags is an organic and reusable/environment friendly alternative to chemical fertilizers.

Fast Grow Garden Mix

A fast growing mix for a quick harvest all in one. Enjoy Cherry Belle Radishes, Romaine Lettuce, Summer Straightneck squash, and Bush Beans each in their own packets to make the perfect mix.

Spring Garden Mix

A spring garden all in one. Enjoy Beefsteak tomatoes, Scarlet carrots, Summer Straightneck squash, and Romaine Lettuce each in their own packets to make the perfect mix.

Tomato Twine - IRRIGATION-MART

6,300 ft Tomato Twine
Heavy duty strength, 2,300 ft per pound (3lb box)
Easy feed from top of box
Box has belt loop slots
Poly twine, easy on the plants

Bean Bush - Blue Lake

Blue Lake Bush beans are a popular variety of green beans that are known for their delicious flavor, large yields, and disease resistance. They are a bush variety, which means that they do not need to be staked, making them a good choice for small gardens or containers. Blue Lake Bush beans mature in about 50 days, and the pods are 5 to 6 inches long and stringless. They are a versatile vegetable that can be eaten fresh, canned, or frozen.

Black Krim Tomato

Black Krim is a Russian heirloom tomato that produces dark red-purple fruits with a rich, sweet flavor. It is an indeterminate variety that matures in 70-90 days. The fruits are large and meaty, and they are perfect for eating fresh, making salsa, or canning. Black Krim tomatoes are also a popular choice for home gardeners because they are relatively easy to grow.

Cabbage-Brunswick

A beautiful variety with uniform compact heads; quick to grow, quick to harvest; heads grow up to 3lbs each; great for sun loving gardens or containers; ideal flavor for fresh coleslaw; performs well in cooler weather. Ready in 70 days

Better Boy F1 Hybrid

Better Boy VFN Hybrid F1 is a disease-resistant tomato with exceptional flavor that grows well in various conditions. Its juicy, meaty tomatoes weigh 12-16 oz with classic tomato taste. Resistant to wilt and nematodes. Takes around 70-75 days to mature.

Cabbage- Green Express

A beautiful variety with uniform compact heads; quick to grow, quick to harvest; heads grow up to 3lbs each; great for sun loving gardens or containers; ideal flavor for fresh coleslaw; performs well in cooler weather

Celebrity Hybrid

Celebrity is a hybrid tomato variety that produces delicious, medium-sized fruits in clusters. It is a determinate variety, meaning that it will produce all of its fruit at once, rather than throughout the season. Celebrity is also a disease-resistant variety, making it a good choice for home gardeners in many climates.

Cherokee Purple

The Cherokee tomato, a dark purple heirloom variety from Tennessee, is said to have originated from Cherokee gardeners. Its flavor is comparable to that of the Brandywine tomato, and the brick-red flesh makes for an appealing display when sliced. The plants are prolific, producing large vines that yield tomatoes up to 5" in diameter and 3 1/2" deep.

Early Prolific Straightneck Summer Squash

This variety of summer squash is a prolific producer of yellow, straight-necked fruits that are perfect for pickling, grilling, or eating raw. The Early Prolific Straightneck matures in 60 days, making it a great choice for short-season gardens. The seeds are packed in a 20-seed packet.

Kale Lacinato

Lacinato kale, also known as Tuscan kale, dinosaur kale, or cavolo nero, is a variety of kale that is native to Italy. It has dark blue-green leaves with a "crinkly" texture and a slightly bitter taste. Lacinato kale is a nutrient-rich vegetable that is high in vitamins A, C, and K, as well as calcium and iron. It is also a good source of fiber.

Lacinato kale can be eaten raw or cooked. It is often used in salads, soups, stews, and stir-fries. It can also be roasted or braised. Lacinato kale is a versatile and delicious vegetable that can be enjoyed in many different ways.

Early Hot Jalapeno

Early Hot Jalapeño seeds are a type of hot pepper that is perfect for growing in short-season climates. They mature in 65 days, making them one of the earliest jalapeños available. The peppers are green when they are young, but they turn red as they mature. They have a medium heat level and a delicious, smoky flavor.

Gourd- Birdhouse

Experience the enchanting beauty of nature with our Gourd Birdhouse seeds. These seeds will bring a touch of whimsy and charm to your garden while providing a cozy home for our feathered friends.

Gourd Birdhouse (*Lagenaria siceraria*) is a vine-like plant that produces uniquely shaped fruits, perfect for crafting birdhouses. These fruits have a hard outer shell that dries naturally, providing a durable and long-lasting structure for nesting birds. The gourds typically grow to be around 8 to 12 inches (20 to 30 centimeters) in diameter, making them an ideal size for small to medium-sized bird species.

Lettuce - Green Salad Bowl

Salad Bowl lettuce seeds are a type of loose-leaf lettuce that is known for its sweet, crisp flavor and large, deep green leaves. They are a good choice for both home gardeners and commercial growers. Salad Bowl lettuce is easy to grow and can be harvested in as little as 45 days. It is a versatile lettuce that can be used in a variety of dishes, both raw and cooked. Salad Bowl lettuce is a good source of vitamins A and C, and it is also low in calories and fat.

Mortgage Lifter Tomato

Mortgage Lifter is a large, beefsteak tomato that is perfect for slicing, dicing, or eating fresh. It has a rich, sweet flavor and a smooth, creamy texture. Mortgage Lifter tomatoes are also relatively easy to grow, making them a popular choice for home gardeners.

Pepper- Sweet Banana

Sweet banana peppers are a type of chili pepper that is known for its mild, sweet flavor. They are typically yellow or green in color, and they can grow to be about 6 inches long. Sweet banana peppers are a popular ingredient in many dishes, such as pizzas, sandwiches, and salads. They can also be pickled or stuffed. Sweet banana peppers are a good source of vitamins A and C, and they are low in calories and fat. They are also a good source of dietary fiber.

When to plant: Sweet banana pepper can be planted in the spring or fall. In the spring, plant the seeds as soon as the soil can be worked. In the fall, plant the seeds 4-6 weeks before the first frost.

Spacing: Plant the seeds 1/2 inch deep and 1 inch apart. Thin the seedlings to 6-8 inches apart once they have grown a few sets of leaves.

Care: Sweet banana pepper is a relatively easy plant to care for. Keep the soil moist but not soggy, and fertilize every few weeks with a balanced fertilizer. Sweet banana peppers are ready to harvest when they are about 4-6 inches long.

Red Beefsteak

The Red Beefsteak Tomato is a classic heirloom variety that produces large, juicy, flavorful tomatoes. These tomatoes are perfect for slicing and eating fresh, or for making sandwiches, salads, and salsas.

Sow seeds indoors 6-8 weeks before the last frost date.

Transplant seedlings outdoors when the soil is warm and the danger of frost has passed.

Space plants 24-36 inches apart.

Provide full sun and regular water.

Fertilize every 2 weeks with a balanced fertilizer.

Harvest tomatoes when they are fully ripe.

Super Sweet 100 Hybrid

Super Sweet 100 is a popular cherry tomato variety known for its exceptional sweetness. The tomatoes are small and round, with a diameter of about 1 inch. The plant is a prolific producer, and a single plant can yield up to 100 tomatoes. It matures in approximately 60 days after transplanting and is resistant to many common tomato diseases. It's an excellent choice for snacking, salads, and other dishes that call for small, sweet tomatoes.

Tomato Roma VF

Roma tomatoes, also known as plum tomatoes, are a type of tomato that is small and oblong in shape. They are typically red in color, but can also be found in yellow, orange, and green varieties. Roma tomatoes are a popular choice for canning and making sauces and pastes, due to their high flesh-to-juice ratio. They are also a good source of vitamins A and C, as well as lycopene, an antioxidant that has been linked with a reduced risk of cancer.

Watermelon - Crimson Sweet

The Watermelon Crimson Sweet is known for its large size, typically weighing between 15 to 25 pounds (6.8 to 11.3 kilograms), making it ideal for sharing at picnics, barbecues, and family gatherings. Its oblong shape and smooth, dark green rind with light green stripes make it visually appealing and easily recognizable.

Tomato- Jet Star Hybrid F1

Jet Star is an early-season, indeterminate tomato variety that is known for its large, uniform fruit and its resistance to cracking. The fruit is a deep red color and has a sweet, mild flavor. Jet Star tomatoes are a good choice for fresh eating, canning, or making sauces.

African Daisy - Mixed Colors

The African Daisy - Mixed Colors is a stunning addition to any garden or landscape. With its vibrant blend of colors ranging from oranges and yellows to pinks and purples, it is sure to make a statement. This easy-to-grow seed boasts a germination time of 7-14 days and can be planted in either full sun or partial shade. Once fully matured, the African Daisy will bloom from late spring to early fall, attracting bees, butterflies, and other pollinators. Ideal for creating a colorful border or accent piece, this mixed variety is a must-have for any gardener.

Bachelor Button - Mixed Colors

,flowering period, growing conditions, and any special features. The Bachelor Button - Mixed Colors is a delightful addition to any gardener's repertoire. These lovely flowers produce cheerful blooms in varying shades of blue, pink, white, and red, making them perfect for creating a colorful garden display. Germination time is typically around 10-14 days, with flowering periods occurring during the summer months. These hardy annuals are easy to grow and require little maintenance, thriving in well-drained soil and full sun. With their unique globe-shaped flower heads and long stems, Bachelor Buttons are a beautiful addition to any garden or floral arrangement.

Butterfly weed

Butterfly weed is a lovely wildflower that is perfect for attracting butterflies to your garden. The plant produces vibrant orange flowers that bloom in midsummer and attract butterflies, hummingbirds, and bees. It grows to be about 2-3 feet tall and gives off a slightly sweet fragrance. The seeds generally have a germination time of 14-21 days and prefer well-draining soil with plenty of sun. This plant is easy to grow and is a great way to add color and life to your garden.

Aster - Crego

The Aster - Crego is a perfect addition to any garden, with vibrant flowers ranging from purple to pink. This plant typically blooms in late summer to early fall and attracts an array of bees and butterflies. Its tall stems can grow up to 24 inches and require full to partial sun for optimal growth. Germination time for this seed is on average 10-14 days, making it an easy and quick addition to any garden.

Balsom - Camila Flower Mixed Colors

Balsom - Camila Flower Mixed Colors! This gorgeous flower variety instantly adds a pop of color to any garden or landscape. With its vibrant mix of hues, including shades of pink, red, and yellow, you're sure to find a shade that suits your style. Plus, these seeds have a relatively short germination time, so you'll be enjoying these beautiful blooms in no time. Plant your own Camila Flower Mixed Colors and watch your garden come to life!

Coleus - Rainbow Mix

The Coleus 'Rainbow Mix' is a vibrant and colorful addition to any garden with its unique blend of red, pink and green foliage. Each seed packet contains a mixture of different colored variants, making every plant one of a kind. These hardy plants require minimal maintenance and can thrive in both full sun and partial shade. Coleus 'Rainbow Mix' seeds typically take 7 to 14 days to germinate, making them a quick and easy addition to any garden. Buy now and add a stunning pop of color to your outdoor space!

Dahlia - Mixed Colors

Dahlia - Mixed Colors is a stunning blend of vibrant hues that can enhance any garden or landscape. These seeds have a high germination rate, making them very easy to grow. They require full sun exposure and well-drained soil to thrive. With proper care, Dahlia - Mixed Colors can bloom from mid-summer until the first frost. Add this beautiful flower to your garden and enjoy its dazzling display of color!

Foxglove - Mixed Colors

Foxglove - Mixed Colors are the perfect addition to any garden with their stunning array of colors. These seeds can be planted in the early spring and will start to germinate within 14-21 days. Foxglove - Mixed Colors can grow up to 4 feet tall and provide a beautiful backdrop for other flowers or can stand alone and be a majestic centerpiece. With their long stems and vibrant colors, these Foxgloves are sure to make your garden a sight to see.

Sunflower- Cut Red

Sunflower 'Pro Cut Red' is a variety of sunflower (*Helianthus annuus*) known for its stunning deep red flowers. It is a popular choice among gardeners and flower enthusiasts due to its vibrant color and compact growth habit.

Forget me not

Forget me not is a charming and easy to grow flower that will add a pop of blue to any garden. These seeds are perfect for those who want a low maintenance yet beautiful addition to their outdoor space. The seeds germinate in just 7-14 days, and with proper care, the first blooms can be harvested in as little as six weeks. These delicate blooms will continue to grow and flourish throughout the summer months, making sure you never forget their beauty.

Shasta Daisy - Alaska

The Shasta Daisy - Alaska is a gorgeous perennial that will add beauty to any garden. It has pure white petals surrounding a golden center that blooms from late spring to summer. This easy-to-grow plant boasts a quick germination time of approximately 10-14 days, and can thrive in full sun to partial shade. It enjoys well-drained soils and is drought-tolerant once established. As a bonus, it attracts bees, butterflies, and other beneficial insects to the garden. Get ready to enjoy the beauty of the Shasta Daisy - Alaska in your own garden!

Herb Growing Kits

Our Herb Growing Kits are the perfect way to get kids interested in science and teach them about the benefits of growing their own herbs. All you need is to add water and use soil as compost, and you'll have fresh, healthy herbs right at your fingertips. Our kits are fun and educational, and will teach kids about the importance of sustainability and healthy eating. Give the gift of a Herb Growing Kit today!

Pepper Growing Kit

Our Pepper Growing Kit is perfect for teaching kids about science and the joys of gardening. The kit includes everything you need to grow your own peppers, including a reusable container and easy-to-follow instructions. Simply add water to the mess-free container and watch your peppers grow! Once they're ready, transplant them into your garden after all frost has passed. Get your Pepper Growing Kit today and enjoy fresh, delicious peppers straight from your backyard.

Lettuce Growing Kits

The Lettuce and Leafy Greens Growing Kit is the perfect way to grow fresh and healthy greens in the comfort of your own home. With everything you need included in the kit, just add water and watch your lettuce and leafy greens grow. This kit is suitable for a sunny location and it's great for introducing kids to the science of plant growth. Get ready to enjoy delicious, homegrown salads with our easy-to-use and versatile growing kit.

Tomato Growing Kit

The Tomato Growing Kit is perfect for kids who are interested in science and growing their own plants. Our kit includes everything needed to grow a beautiful tomato plant from scratch, including seeds, soil, and a reusable container. All you have to do is add water and watch your plant grow! Our kit is a great way to teach kids about the natural world and the importance of sustainable food practices. With our Tomato Growing Kit, growing your own food has never been easier or more fun! For Every 2 sold we donate one kit to Kids learning gardening.

Cantaloupe- Hales Best Jumbo

Hales Best Jumbo Cantaloupe (*Cucumis melo*) is a popular and highly regarded variety known for its exceptional size, flavor, and aromatic qualities. The fruits are renowned for their rich orange flesh, firm texture, and sweet, tropical taste.

Collard - Georgia Southern

Georgia Southern Collard (*Brassica oleracea* var. *acephala*) is a traditional variety known for its large, dark green, and crinkled leaves. This leafy green vegetable thrives in warm climates and is cherished for its robust flavor and nutrient-packed profile.

Okra - Clemson Spineless

Clemson Spineless is a popular variety of okra (*Abelmoschus esculentus*) known for its tender, spineless pods and excellent flavor. It is a widely cultivated and highly regarded okra variety, particularly in Southern United States and other warm regions.

Carrot - Scarlet Nantes

Scarlet Nantes carrot seeds are an heirloom variety that is known for its sweet, crisp flavor and nearly coreless roots. They are a good choice for both home gardeners and commercial growers. Scarlet Nantes carrots are easy to grow and can be harvested in as little as 75 days. They are a versatile vegetable that can be eaten raw, cooked, or juiced. Scarlet Nantes carrots are a good source of vitamins A and C, and they are also low in calories and fat.

Cucumber- Boston Pickling

Boston Pickling Cucumber (*Cucumis sativus*) is a classic variety specifically bred for its ideal characteristics for pickling. These compact and prolific vines produce an abundance of straight, medium-sized cucumbers with thin, tender skin that's perfect for preserving in vinegar brines.

Pumpkin- Jack O Lantern

Jack O'Lantern Pumpkins (*Cucurbita pepo*) are renowned for their iconic appearance and suitability for carving. These medium-sized pumpkins feature a smooth, ribbed skin in a vibrant shade of orange, ideal for capturing the essence of Halloween traditions.

Radish- Cherry Belle

Cherry Belle Radish is a small, round, red radish that is known for its mild flavor and quick growth. It is a great choice for early spring gardening and can be eaten raw, cooked, or pickled.

When to plant: Radish can be planted in the spring or fall. In the spring, plant the seeds as soon as the soil can be worked. In the fall, plant the seeds 4-6 weeks before the first frost.

Spacing: Plant the seeds 1/2 inch deep and 1 inch apart. Thin the seedlings to 2-3 inches apart once they have grown a few sets of leaves.

Care: Radish is a relatively easy plant to care for. Keep the soil moist but not soggy, and fertilize every few weeks with a balanced fertilizer. Radishes are ready to harvest when they are about 2 inches in diameter.

Tomato - Heirloom Mix

Heirloom tomatoes are prized for their rich history and exceptional taste. Unlike modern hybrid varieties, heirlooms have been passed down through generations, preserving their unique traits and flavors. Our Heirloom Tomato Mix offers an exciting assortment of these cherished varieties.

Zucchini Squash- Dark Green

65 days

Sow 1" deep every 36"

This variety of zucchini has a smooth, straight, green outer skin with a creamy white flesh. Perfect for cooking and frying.

Squash- Crookneck

Crookneck Squash (*Cucurbita pepo*) is a classic variety known for its distinct crooked neck and bright yellow skin. This warm-season vegetable produces an abundance of tender, flavorful squash that is versatile in the kitchen and a favorite among gardeners.

Basil - Greek Miniature

Basil - Greek Miniature is a compact variety of basil that grows well in containers and small spaces. It has a sweet, spicy flavor that is perfect for Mediterranean dishes, pesto, and salads. With a germination time of 5-10 days, this basil can be harvested in 30-40 days from sowing. It is a versatile herb that can be used in a wide variety of dishes and is a must-have for any herb garden.

Basil -Genovesse

The Basil - Genovesse is a classic Italian variety with a rich aroma and strong flavor. These seeds are easy to germinate both indoors and outdoors in warm temperatures. Harvesting can begin 60-90 days after sowing and should be done frequently to promote new growth. This versatile herb is perfect for making pesto, adding to salads, or as a seasoning for a variety of dishes. Enjoy fresh, aromatic basil all season long with these high-quality seeds.

Basil- Italian Large

Italian Large Leaf Basil is a culinary herb with a sweet and clove-like flavor. It is a large variety with medium-dark green leaves, and is bigger than most other basil varieties found in the herb family. Italian Large Leaf Basil is fairly resistant to damage from pests and diseases, and self-seeds easily. It grows well in a container or in the garden, and is a favorite of chefs and bees alike. Italian Large Leaf Basil is a must-have for any herb garden, and is perfect for use in pesto, spaghetti sauce, or simply as a garnish.

Basil - Spicy Globe

The Basil - Spicy Globe is a unique variety that features a strong spicy flavor and a distinctly globe-shaped growth pattern. Germination is easy and usually takes around 5 to 10 days, making it a great choice for both novice and experienced gardeners. Harvesting can begin as soon as the plants reach a mature height of around 6 inches, with leaves and stems suitable for use in a range of dishes, from salads to soups and beyond. With its bold flavor and compact size, the Basil - Spicy Globe is perfect for small-space gardens, container gardening, or even as a beautiful and fragrant indoor plant. Order your seeds today and start growing your own delicious and unique basil!

Basil -Sweet

Basil-Sweet is an aromatic and flavorful herb that is perfect for seasoning salads, sauces, and classic Italian dishes. With this type of Basil, you'll enjoy a sweet and slightly spicy taste that's sure to tantalize your taste buds. This Basil-Sweet seed is easy to grow, and it can germinate within a few days of planting. After a few weeks, you can harvest the leaves and enjoy fresh, homegrown basil in your kitchen. Indulge in the true basil experience, with Basil-Sweet seeds from our top-quality collection.

Catnip

Catnip seeds are a perfect addition to any cat lover's garden. With a germination rate of up to 90%, you'll have plenty of plants for your feline friends to enjoy. These plants can be harvested multiple times throughout the season, giving your cats a fresh supply of catnip that they crave. This variety of Catnip is easy to grow and can be grown both indoors and outdoors, making it a versatile addition to any garden.

Chamomile

Chamomile seeds produce a charming and fragrant herb that serves a multitude of medicinal purposes. These seeds germinate quickly in moist soil and require moderate watering. Chamomile can be harvested as soon as the first blossoms appear and can be plucked and dried for future use. The flowers can be used to brew tea, as well as being added to ointments and cosmetics. Don't miss out on the opportunity to grow this versatile herb in your personal garden.

Dill - Bouquet

Dill bouquet is a type of dill that is grown for its ornamental value. It has feathery, green leaves and yellow flowers that make it a beautiful addition to any garden. Dill bouquet is also edible and can be used in cooking. It has a mild, licorice-like flavor that is perfect for pickling, soups, and salads.

Dill bouquet is easy to grow and can be planted in the spring or fall. It prefers full sun and well-drained soil. Dill bouquet is a relatively low-maintenance plant and does not require much fertilizer or water. It can be harvested as needed throughout the growing season.

Dill bouquet is a versatile herb that can be used in a variety of ways. It can be added to fresh salads, soups, and stews. It can also be used to make pickles, sauerkraut, and other fermented foods. Dill bouquet can also be dried and used as a seasoning.

Dill bouquet is a delicious and nutritious herb that is a great addition to any garden. It is easy to grow and can be used in a variety of ways. If you are looking for a new herb to try, dill bouquet is a great choice.

Dill - Mammoth

Dill - Mammoth, also known as *Anethum graveolens*, is a delightful herb that adds a tangy flavour to a variety of dishes. This variety of dill produces large, fragrant leaves that are excellent for pickling or seasoning meals. Germination begins within 7-10 days and the plant will reach maturity in approximately 60 days. The optimal time for harvesting is when the plant reaches 36-48 inches in height, and the seed heads are just beginning to form. This easy-to-grow herb is perfect for any gardening enthusiast, and its strong flavour will give your dishes a unique zing.

Cilantro - Santo

Santro cilantro is a variety of cilantro that is known for its strong, flavorful leaves. It is a good choice for both home gardeners and commercial growers. Santro cilantro is easy to grow and can be harvested in as little as 55 days. It is a versatile herb that can be used in a variety of dishes, both fresh and cooked. Santro cilantro is a good source of vitamins A and C, and it is also low in calories and fat.

Lavender - True

Lavender - True seeds are perfect for gardeners looking for fragrant and beautiful blooms. They are easy to germinate and soon produce tall and elegant plants with slender stems. With long blooming periods ideal for harvesting, the Lavender - True seeds promise an abundance of stunning flowers. This variety is perfect for growers looking to create a charming, aromatic garden space that is perfect for relaxation and unwinding. When harvested, the Lavender - True's calming scent rejuvenates the senses and promotes relaxation.

Oregano

Oregano seeds are the perfect addition to any herb garden. With a germination rate of over 80%, you can expect to see sprouts within just a few days of planting. Make sure to plant your seeds in well-drained soil and give them plenty of sunlight for optimal growth. Harvest your Oregano leaves when the plant reaches about 4 inches in height, taking care not to cut away too much at once to avoid harming the plant. These fresh, flavorful leaves are perfect for adding to Mediterranean dishes or even tossing in a salad for an extra burst of flavor.

Rosemary

Rosemary is a wonderful herb that not only provides amazing flavor to your meals but also adds beautiful fragrance to your garden. This herb is easy to grow from seed and has a germination time of 14-21 days. Once it's established, it'll grow well in full sun and well-drained soil. Rosemary can be harvested anytime but it's best to wait until the plant reaches about 8 inches tall. With its earthy flavor and many uses, rosemary is a must-have in every herb garden.

Thyme - Common

Thyme Common is an essential herb in any home garden. With excellent germination rates, these high-quality seeds will give you a bountiful crop of fragrant and flavorful thyme. Harvest the small, delicate leaves throughout the growing season for use in your favorite recipes, or dry them for long-term storage. This versatile herb pairs well with meats, vegetables, and even in teas and other beverages. Bring the fresh taste of thyme to your kitchen with Thyme Common seeds.

Parsley - Giant Italian

The Parsley - Giant Italian is a must-have for culinary enthusiasts. This tasty herb has flat, dark green leaves that are incredibly fragrant and pack a powerful punch of flavor. Germination takes approximately 14-21 days and harvesting can begin when the plant reaches 8-10 inches tall. This variety of parsley is known for its long, thick stems and large leaves, making it a great addition to any dish. Get your seeds today and enjoy the freshness of homegrown parsley!

Sage - Broad leaf

Sage (Broad leaf) is an essential herb for any gardener with a green thumb! This versatile and robust plant can be easily grown from seed, with fast germination and low maintenance requirements. Once ripe, the leaves can be harvested and used in a variety of recipes, such as seasoning meat or adding flavor to teas. Our Sage seeds are of the highest quality, ensuring a bountiful harvest of large, flavorful leaves for all your cooking needs. Start your very own Sage garden today!

Arugula Astro

Arugula Astro Seeds are a delicious and versatile addition to any garden. This variety of arugula has long, green leaves with a mildly spicy flavor. It is perfect for growing in cool weather, and can be harvested as baby greens or allowed to mature into full-sized plants. Arugula Astro Seeds are easy to grow and produce a high yield of delicious greens.
